

Troop 90 Calendar On Your Smartphone

Never miss a troop event again!

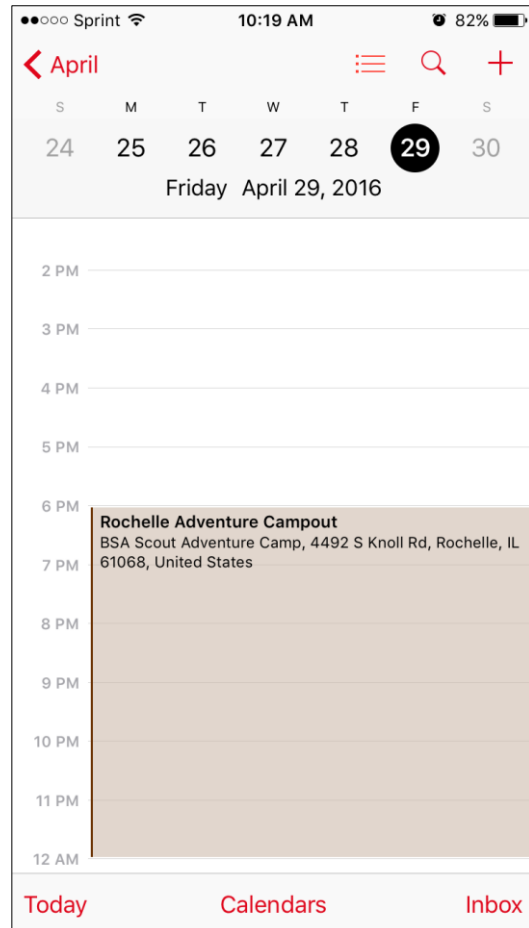

A new feature of the BSA Troop 90 website is to incorporate a web based calendar system. This calendar is hosted Google's calendar platform allowing easy integration to personal devices. Integrating the calendar directly into your smartphone's calendar allows for easy access to information. You can directly view permission slips, map details and receive alerts prior to an event. Since the calendar is cloud hosted, updates happen in real time; essentially you do not have to synchronize, the work is done for you! Review the calendar, sign up for a campout! We hope to make it that easy!

Below are some screenshots of the Troop 90 calendar integrated into an iPhone 6 running iOS 9. Similar functions exist for Android based phones.

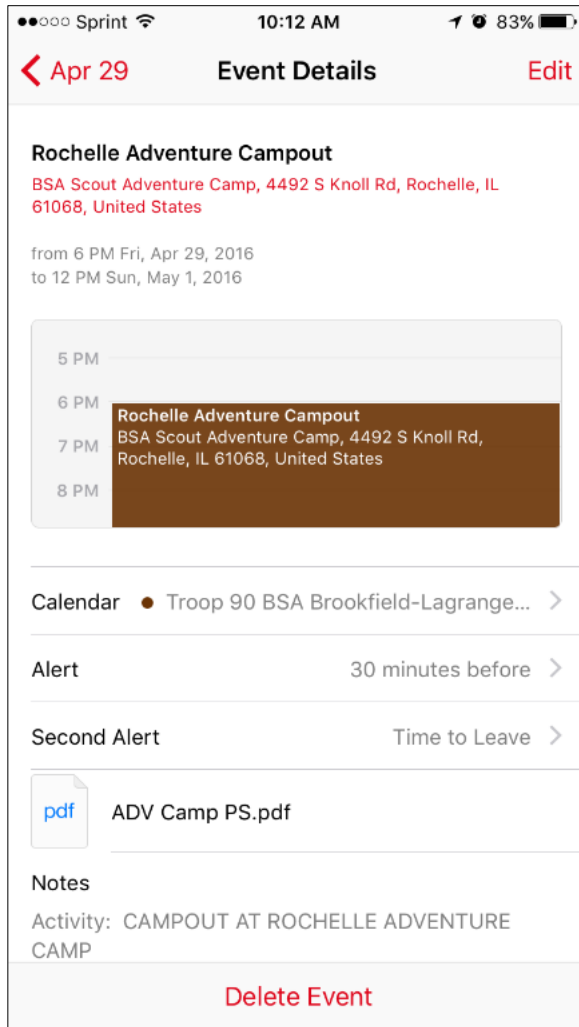

Days with Scouting events have identifiers.

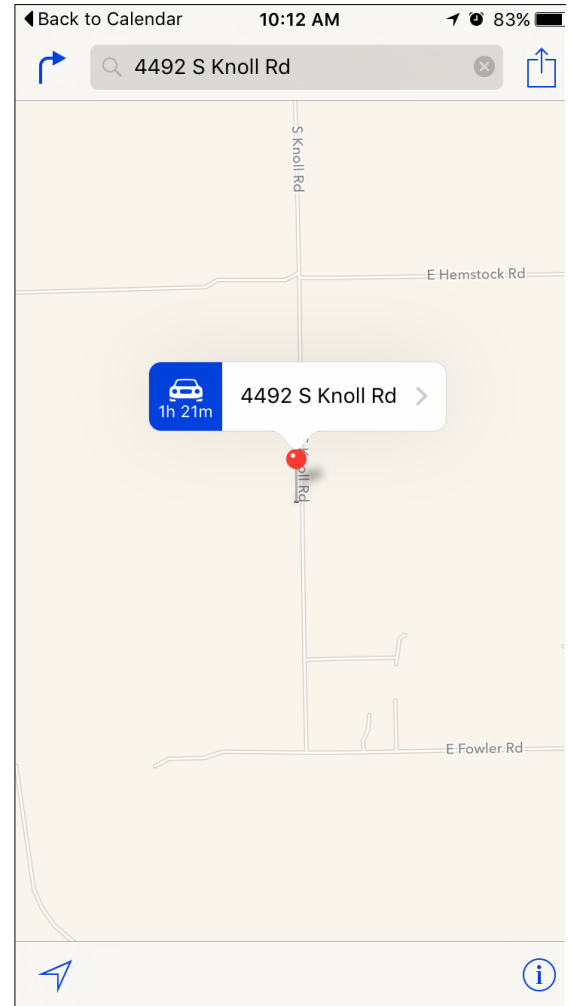

Click a day to see more details.

Click to open an event see additional details.
All details are displayed and attached a permission slip in PDF format.

Tap on the address to activate your phone's map application. Helpful for directions while driving to a campout or event.

If you would like more information on adding Troop 90's calendar to your smartphone, please visit the tutorial located here: <http://www.troop90bsa.org/calendar-subscription.html>
